

Andy M Truman

Newport, Wales, United Kingdom

Senior DevSecOps / Security Engineer with over ten years of experience. Strong technical aptitude with a focus on cloud-native security, automated pipelines, and infrastructure as code. Known for solving complex technical problems and partnering with developers to build a strong security culture.

Most recently led DevSecOps operations for an internal AI acceleration team, designing secure container sandboxes and least-privilege access patterns for agentic workflows in a regulated domain.

Available for remote contract work and permanent (PAYE) roles (Full & Part Time). Flexible start date. Previous SC clearance now lapsed, open to re-vetting. Available for hybrid local roles. Not available to relocate.

Principal Skills

Azure & AWS Cloud	Security Culture	Edge Security	IaC
DAST, SAST, SCA Pipelining	Security Tooling	Bug Bounties	Scripting

Supporting Skills

Vulnerability Remediation	PaaS/SaaS/IaaS	Kanban & Agile	OWASP
Serverless & Containers	Risk Assessment	Secrets Management	Infosec

Technologies & Tools

Azure DevOps/Github	Terraform	Lambda & Function Apps	Cloudflare
Snyk & Probely	Checkov & TFLint	Bash & Python	Docker

Achievements

- Key contributor in increasing security posture for a £700m acquisition by Visa, leading remediation and addressing vulnerabilities.
- Designed the entire Terraform Infrastructure as Code (IaC) estate for a flagship product, establishing secure cloud architecture.
- Implemented shift-left security by integrating automated SAST, DAST, and SCA scanning directly into CI/CD pipelines.
- Reduced GDPR risk by developing Python tooling to sanitize production-sized test datasets and prevent PII leakage.
- Established Security Champions programs and managed HackerOne bug bounty platforms across multiple organizations.
- Managed relationship with external penetration testing firms, verifying findings and driving remediation to resolution.

Personal Development

- Working toward HTB Certified Web Exploitation Specialist (CWES) certification.
- Expanding multi-cloud security expertise into AWS cloud architectures and services.
- Researching large language model (LLM) security vulnerabilities and mitigation patterns.

Andy M Truman

Employment History

Cleary Gottlieb Steen & Hamilton LLP (Remote, UK) February 2026 – July 2026

Senior DevSecOps Engineer

- First Senior DevSecOps hire, leading security operations for the AI acceleration department.
- Maintained secure container sandboxes for data science workflows and agentic LLMs.
- Designed secure-by-default cloud infrastructure and CI/CD pipelines (SAST/DAST/SCA).
- Managed threat modeling, least-privilege IAM, and ISO/SOC 2 compliance.

Senior DevSecOps | AI Security | IaC | Compliance | Threat Modelling

Cencora (Remote, UK) July 2023 – January 2026

Principal DevSecOps Engineer

- Established and Chaired Security Champions initiative with substantial buy-in from Engineering.
- Initiated and successfully delivered HackerOne bug bounty program to product suite.
- Implemented automated process to reduce security vulnerability count in K8s container images.

Principal Engineer | AppSec | Process Improvement | Mentorship | Secure SSDLC

ieso (Remote, UK) March 2022 – July 2023

Cloud Security Engineer

- Established company's greenfield security capacity from scratch as part of initial security team.
- Ownership of annual pen-tests, prioritisation of vulnerabilities, and overseeing remediation efforts.

DevSecOps | Azure | DAST | Security Leadership | SIEM

Currencycloud - A Visa company (Remote, UK) October 2020 – March 2022

Security Engineer

- Responsible for vulnerability remediation, including managing relationship with HackerOne.
- Sanitised production-sized duplicate dataset using Python, Pandas & Lambda to reduce GDPR risk.

Vulnerability Remediation | Hackerone | Elastic Beanstalk | AL2 | Cloudflare

W2 (Newport, UK) June 2018 – October 2020

Cloud Security Engineer

- Deployed a code quality & inspection tool, integrated with CI/CD to encourage secure development.

Terraform | Security Leadership | Serverless | ISO 27001 | Pipeline Security

Education

University of Wales - BSc (Hons) Computing – 2:1

September 2005 – August 2008

Dissertation: 'Creating a Computer Based Learning Encryption Algorithm Program'
